About me

A portuguese web developer that is specialized in backend development and consulting.

My specialized skills and knowledge rely on: design patterns in web development, PHP (5+ years, since 5.4), Laravel (5+ years, since 5.3), SQL and other relational databases (5+ years, specifically MySQL since 5.7).

SOLID, Clean Code, KISS, DRY and TDD are some of the principles that I've got to know and apply overall in my career.

I've also earned knowledge over the years on a whole set of related subjects such as non-relational databases, cyber security, encryption, networking, frontend and mobile development.

Always eager for opportunities to apply my knowledge and push myself to the limit, I take pleasure in understanding how things work and providing solutions to problems.

Work experience

📅 10/2022 – PRESENT 📍 REMOTE, GERMANY

Backend PHP Developer AboutYou

- Maintenance and development of new functionality in existing systems
- Peer code review

Some of the technologies used: MySQL, MongoDB, Laravel, Silex, Docker, Kubernetes, DataDog, Kibana, Elasticsearch, PHPUnit, Codeception, Redis, JIRA

📅 05/2017 – 10/2022 📍 PORTO, PORTUGAL

Backend PHP Developer, team leader and project coordinator Zalox

- Design and implementation of relational databases
- Backend development with PHP on Laravel (5.x up to 9) with unit and feature testing
- Spearheaded a couple projects from scratch to delivery
- Responsible for infrastructure implementations such as: CD/CI, server configurations, server migrations, monolith and containerized approaches

Work experience

- Peer Code Review
- Responsible for onboarding internships

Some of the technologies used: Kubernetes, Docker, GoogleCloudPlatform, PHP, Laravel, MySQL, SQLite, PHPUnit, Elasticsearch, Meilisearch, Magento, Wordpress, Redis, POSTGRESQL, CDCI, JIRA

📅 01/2022 – PRESENT 📍 PORTUGAL

Freelancer - Referee / Tournament Administrator Inygon

- Working on brand initiatives online or at on site events such as: Comic-Con at Feira Internacional de Lisboa
- Tournament management with constant filed reports to track down potential issues
- Supervision and management of semi-professional teams on site and remote

📅 03/2017 – 05/2017 📍 PORTO, PORTUGAL

Junior .NET Engineer Altran

- Work placement as .NET developer
- Development of a RESTful web service to support an on-going Android and Windows Phone application
- A small development experience on JavaScript, HTML and CSS on an internal project

Some of the technologies used: MySQL, POSTGRESQL, C#, ASP.NET, jQuery

📅 02/2012 – 08/2012 📍 MAIA, PORTUGAL

Web developer intern Centro de Estudos de Língua, Comunicação e Cultura

- Developed and maintained support for three internal projects that were made in Wordpress.

English	Full
Spanish	Limited

Certifications

Certificate of Pedagogical Competencies by IIEFP - Issued in July 2021 (Credential ID F716963/2021)

Education

2013 – 2016 MAIA, PORTO
System informations and software | Bachelor
Universidade da Maia - ISMAI

Main topics of interest:

- Developed an android project using Java, web projects and APIs with SOLID, KISS, MVC principles using .NET (C#)
- Introduction to unit testing and version control
- Extensive knowledge in Design Patterns, Cyber-security, Algorithms, Network analysis, Relational database schematics

2012 – 2013 MAIA, PORTO
Software development | Level 5 EQF | CET - System informations development
Universidade da Maia - ISMAI

Main topics of interest:

- Developed further skills in programming with OOP and PHP

Education

2011 – 2012 PORTO, PORTO
Software development | Level 4 EQF | Year 0 | Bachelor integration program
Instituto Superior de Engenharia do Porto

Main topics of interest:

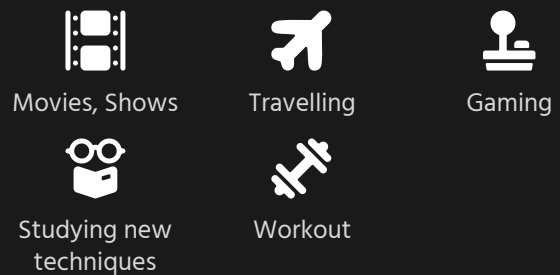

- Introduction to programming with pseudo-code and Visual Basic

2006 – 2010 MAIA, PORTO
IT Sector | Level 4 EQF | Maintenance of electronic equipments
Escola Secundária da Maia

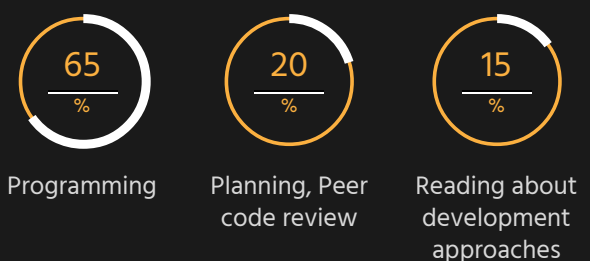

Main topics of interest:

- Introduction to programming with pseudo-code and Pascal
- Introduction to programming with integrated circuits
- Introduction to networking and security
